## Political Candidates Address Electors

On Tuesday evening J. W. Robinson, Independent candidate for Acadia Provincial Riding, addressed the electors at the school hall. The attendance was not large in numbers, but the speaker was given a very courteous hearing. Mr. Robinson pointed out to the electors that the U.P.A. Government had promised to reduce the taxes, but had neglected to keep these promises, in fact had raised new taxes. The speaker said it was time that there were representatives in the legislature strong enough to influence the party in power and help in keeping down taxation.

He explained very fully the Natural Resources question and said he doubted whether the province would derive much financial benefit from that source for some time to come.

In closing the candidate solicited the vote and influence of the electors and promised to support all matters that were for the best interest of the province as a whole and for this constituency.

Mr. Lorne Proudfoot, the U.P.A. candidate in the riding, spoke to a good gathering of the voters on Wednesday evening and was given a very cordial hearing. He spoke very concisely on the work that had been done by the government during the last term and assured those present that the matter of the highway work in this constituency would be completed within three years.

The candidate gave facts and figures on the monies that had been spent during the sessions. He acknowledged that the provincial debt had been increased, but showed that these monies had been well spent in improvements throughout the province, such as additions to the educational facilities, roads and other departments. He appealed to all to give him their support and help to return the U.P.A. government to look after the affairs of this province for another term.

### Market Slump Not Over

Prognosticators of economic futures were not particularly successful when some months ago they intimated that the business depression of that date would be over by the middle of 1930. With July wheat falling below the dollar mark at Winnipeg, Monday, and the New York stock market striking new low levels for the year for its most stable stocks on the same day, it is to be doubted whether the extreme low limit in commodity and stock prices has yet been reached. And from that lowest level it will take some time to bring the economic situation back to normal again.

Latest issues of reputable financial service bulletins indicate that the depression which a few months ago was expected to last but a few months is now likely to be felt throughout the whole of 1930, with the hope expressed that the final months of the year will see things on the upturn.

If that surmise should prove correct and every indication augurs that it will, it will be necessary to record 1930 as a year of marking time in industrial development.

It is in such depression periods that the wage-earner suffers most. It is in such periods that the unemployment situation is invariably found to be most acute. So far as the capitalist and financier are

## GOOSEBERRY LAKE PROVINCIAL PARK

Gooseberry Lake will be the second provincial park reservation to be developed by the Alberta government as part of the public parks policy. The parks board made a visit to the lake a few days ago, looked over the ground, and concluded arrangements for beginning an improvement scheme at once.

A caretaker has been engaged to clear the underbrush on the park site, and the grounds will be given a general cleaning up. The pavilion already standing will be overhauled, including a new roof, and water from a nearby running spring will be piped into it. Sanitary improvements will be installed, and a bath house will be built on the lake front.

For a radius of 50 miles of surrounding country, including the towns of Consort and Coronation, Gooseberry Lake will be a natural holiday resort and picnic ground. It is situated about eight miles north of Consort and 40 miles from the Saskatchewan border. The lake is about two miles long, and is beautifully wooded along shore, with excellent beaches. The government last fall bought 130 acres of park land fronting the lake, which it is now proceeding to develop. Some attempts had been previously made to maintain the site as a public picnic ground under the private ownership, and a pavilion was erected a few years ago.

By way of experiment, a local advisory committee has been named at Consort to deal with applications for the use of the park, and the committee will recommend to the Parks board. The pavilion has been reserved for three weeks in July for the exclusive use of boys' and girls' camps to be held under church auspices.

The pupils of Miss Margaret Parsons, L. A. B., of Hanna, brought great credit to themselves during a piano recital Tuesday evening. The pupils received their certificates from the Royal Academy of Music, and Miss Margaret Waterhouse, Cereal, Miss Marie Lanhorn, Jack McIlveen received medals given by Miss Parsons.—Hanna Herald.

A. Howton, of Calgary, is visiting at the home of his brother, H. Howton, this week.

concerned, while they undoubtedly suffer, their position is such that as a rule they are able to make provision for tiding over.

With the wage earner it is essential that aid should be forthcoming to see him through. Undoubtedly government should interest itself in his case. At such times wise government will see to it that public works are undertaken to as great extent as possible and that the unemployed are given work by the use of public funds.

Canada thus far has not suffered as greatly as other countries during the 1930 trade depression. Nevertheless suffering among wage earners in Canada is acute enough to call for immediate government action. With the considered judgment of economic experts indicating that we will have come to the end of the year before much improvement may be noted in conditions, it is evident that present suffering will have measurably increased during the months intervening. —Calgary Herald.

## An Encouragement To Progress

The subject of immigration has for many years been a live topic in Canada, and never so much during the past year or two. There is, however, this difference, that whereas for many decades the discussion of the subject was largely as to ways and means whereby a large volume of immigration could be secured, in more recent years the thought of our people has rather been directed towards the successful colonization of the new comers.

That is to say, where at one time the main objective was to get immigrants in large numbers to settle upon our vacant lands, the main objective now is to see that those who do come make a real success of their venture, adapt themselves to the new environment in which they find themselves, and, by associating themselves with the life and activities of the communities in which they locate, identify themselves with Canada and become Canadian citizens in thought and aspiration as well as name.

To a greater extent than ever before native-born Canadians, and those of our citizenship who call the British Isles "home," have come to realize and appreciate the fact that immigrants coming to Canada from lands other than those under the British flag, or speaking the English language, are really, even keenly, anxious to become Canadians in the full meaning of the term. Appreciation of this fact is helping to break down old barriers of prejudice, and the English-speaking Canadian is becoming more and more anxious to co-operate with and assist his fellow-Canadian or foreign extraction.

In a recent issue of this paper there appeared an article in the news columns outlining a plan originated by the Canadian National Railways, under the direction of Dr. W. J. Black, the directing head of the departments of Agriculture and Colonization of that system, having as its object the encouragement of community progress and development, and the attainment of the fullest possible measure of Canadian citizenship by those rural communities of the three prairie provinces which are of European origin.

The plan is simple, but far-reaching and of tremendous importance. It involves the carrying out of a series of competitions among such communities, to be held annually for a period of five years, with three substantial prizes of \$1,000, \$500, and \$250 respectively, to be awarded each year in each of the Provinces of Manitoba, Saskatchewan and Alberta on the understanding that the money be utilized in community work of some progressive nature.

In other words, such of these rural municipalities or groups of school districts within municipalities in which the population is made up of people of continental European origin of the first or second generation, which display the greatest interest in co-operation among themselves to promote education, public health, and a better class of agriculture, and show the best results, will be awarded these prizes, which, in turn, are to be used in still further promoting progressive community betterment.

The community which through the co-operative action of its people shows the best schools, the most regular attendance of pupils, the largest percentage of children going on for secondary or university training, which takes the keenest interest in matters of public health, social welfare, music, arts and handicrafts, which enthusiastically supports community organizations such as agricultural societies, co-operative marketing pools, women's institutes and home maker's clubs, libraries, etc., or which evince the greatest interest and reveal the greatest progress in the improvement of agricultural methods, will be the winners of these substantial prizes.

But the greatest gain to such communities will not be the winning of the prizes, but in the direct and indirect benefits which will accrue to each individual and the community as a whole from the practice of these worthwhile things. The prizes are, after all, but an additional incentive to work for the welfare and advancement of the community which the people therein call "home." The prizes are but a tangible encouragement to excel all other communities in real constructive Canadian citizenship, to demonstrate through a determination to make use of and emphasize the best Canada has to offer in the development of their particular section of the Dominion.

## Death Takes Well Known Railway Official

F. E. Trautman Was C.P.R. Publicity Representative For Many Years

Fred E. Trautman, 66, for almost a score of years publicity representative of the Canadian Pacific Railway in the west, died in Winnipeg recently. He had been operated on as result of a blood poisoning condition and failed to rally.

Mr. Trautman, born in Pennsylvania, worked on newspapers in the eastern United States and at Fort William, Ont., before he came to Winnipeg in 1912 as Canadian Pacific Railway publicity man. In taking the position with the railway under Sir George Bury, he was the first railway press representative in the west.

His territory, through which he

operated since his appointment, extended from Winnipeg to the Pacific coast and included a portion of the western United States.

## Three Delegates From Canada

To Attend Important Celebration In Iceland During July

Premier Mackenzie King stated in the House of Commons that it was thought advisable to have three delegates from Canada at the one-thousandth anniversary of the founding of parliament of Iceland. The event was very important in the history of parliamentary institutions and the government had in mind the presentation to Iceland of something of a permanent nature which would be a memorial of the occasion.

New Use For Diamonds  
That precious stone, the white diamond, has left its exclusively white-collar job and put on overalls. A leading optical company has discovered that the jewel, properly mounted, is the best possible cutting tool for finishing small metal parts, cutting literally thousands of pieces with no chipping in its cutting edge. Aristocracy, whether of gems or men, justifies its existence best by giving the most service.

Many good roads are being constructed in Panama.

## Ocean Bed Is Changing

Shipping Has Been Endangered By Upheavals in Pacific

Strange things are happening in the murky regions of the ocean bed. In the Pacific the bed has been rising so much that shipping has become endangered. Off the west coast of Nicaragua the charts show an ocean depth of 222 feet, but the figure is now actually 2 feet. Another sounding showed the actual depth to be 51 feet where the chart showed 1,608 feet. Sunken upcables on the ocean floor recently worked havoc among the telegraph cables; many of the stoutest were snapped like string, including one of the latest, which normally takes five different sets of messages at once in each direction. When a break occurs the cable ship goes out, delicate apparatus aboard shows the break within two yards of the actual spot, and dragging commences. Up comes the cable. A new length is inserted to make the joint, and so critical is the actual work of joining the strands inside that the film of grease on a man's hand can actually prevent the join from being effective.

## BRIGHT EYES ROSY CHEEKS

## The Birthright Of Every Girl

Dull eyes mean misery and weakness—a sure sign of a bloodless condition. Anemic girls and women have dull, heavy eyes with dark circles underneath. The bright eyes of a girl or woman is always happy and well.

There is one way to make the eyes bright—to bring the glow of health to pale cheeks. Use Dr. Williams' Pink Pills. Dr. Williams' Pink Pills do this and they do it well. Concerning them Mrs. Robert Devitt, Brightening Expert: "Dark eyes are so ill and pale we had to take a pink cream. She was pale, was thin; her eyes were dull and the least exertion upset her. I began giving her Dr. Williams' Pink Pills and in a few months you could not know her. She gained in weight and strength and now is the picture of health."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from Dr. Dr. Williams' Medicine Co., Brockville, Ont.

## Predicts Reduction

## In European Crop

One Third Less Than Last Year Say Wheat Experts

A European wheat harvest of about one-third less than the bumper crop of 1929 is predicted by London, England, wheat experts.

The 1930 harvest, which the experts estimated at about 25 per cent. less than average, was damaged somewhat by a cold, wet spring. Decrease in acreage was cited to account for the remainder of the drop from last year's total.

In the event of a shortage in the current crop in the United States, Argentina and Canada, it was considered certain that prices would be advanced materially.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

## No Mortar Used

Bricks that dovetail and interlock and that are said to form a wall stronger than can be built with the usual kind, are laid without mortar. An angular ridge in the centre of each brick fits into a corresponding groove in the one above it, so that no mortar is necessary to hold the units together, says Popular Mechanics Magazine.

## Bicycles Are Cheaper

More bicycles were made in Canada in 1929 than in any previous year and prices were lower than they have been for thirty years, according to the records of the Canada Cycle and Motor Company.

## NERVES WERE BAD

## Could Not Sleep

## Tired All Day Long

Miss Florence Coutier, Bark Lake, Ont., writes: "I was troubled with my nerves, could not sleep at night, and felt tired all day long."

"A neighbor came in to see me, one morning, and advised me to take

"The first box did me good and after the sixth box I was able to go to work."

Price, 50c, a box at all drugstores and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

## Canada's War Pensions

Liberty Shown By Act Recently Passed By Parliament

The recent War Pensions Act passed by the House of Commons and the Senate keeps the Dominion of Canada in the forefront among nations of the world as to liberality in dealing with war veterans. So far, Canada has paid in pensions and soldier's rehabilitation \$625,000,000. Soldier's insurance, given without medical examination, is at present self-supporting, but before the completion of the scheme the loss as estimated will be over \$25,000,000.

This year's expenses for pensions and soldiers' civil re-establishment is estimated at \$613,904,000. Next year this branch is expected to cost \$2,000,000. The net cost of giving an equivalent of old age pensions at an earlier age to "burnt out soldiers" will cost \$2,000,000 this year and increase annually to 1937, when it will be \$18,000,000. It will expire in 1975, and the aggregate cost will be \$480,000,000.

An immediate outlay of \$7,457,000 will be involved in replacing those on the pension list who committed their pensions. There are 8,048 in this class. The law is made broader in widow's pensions and medical examination and this will also add to the annual cost.

## New Telegraph System

Office-To-Office Connection Would Keep Messages Secret

A new system of telegraphy for London has been suggested by which messages tapped out on a keyboard, like a typewriter keyboard, in a private office, will be transmitted and automatically reprinted in the office of another subscriber. If the new system is installed a subscriber wishing to telegraph by it presses a button to call the exchange, and dials the number of the subscriber to whom he wishes to telegraph, in the same way as an automatic telephone is dialled. When the exchange signals that the connection has been made, both subscribers can typewrite to each other. Their messages will be telegraphed and re-typed automatically. When the communications are finished another button is pressed which ends the connection. The introduction of the system will offer the advantages of quick transmission, the ability to send messages at any time, and complete secrecy, as the direct office-to-office connection will prevent the message being seen by telegraph clerks or other post office employees.

## Plans Elevated Playgrounds

New York Architect Has Idea For Congested Areas

Elevated playgrounds for children over the streets in the congested areas have been proposed by a New York architect. Such playgrounds, in Argentina and Canada, it was considered certain that prices would be advanced materially.

In the event of a shortage in the current crop in the United States, Argentina and Canada, it was considered certain that prices would be advanced materially.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

No Mortar Used

Bricks that dovetail and interlock and that are said to form a wall stronger than can be built with the usual kind, are laid without mortar. ## Preparing Valuable Report

Dr. Weir Making Survey Of Conditions Regarding Nursing Profession

Dr. G. M. Weir, D.Ph.A., head of the school of education and director of the summer session, University of British Columbia, who is making an all-Canada survey of conditions regarding the nursing profession, has been loaned by the B.C. officials to the Canadian Medical Society and the Canadian Nurses' Association with a view to preparing a report on the educational, economic and sociological problems of the nursing profession. His head office is in Toronto.

## Recipes For This Week

(By Betty Barclay)

## JELLED VEGETABLE RELISH

1 package lemon flavored gelatin.  
1 cup boiling water.  
2/3 cup strained tomato juice.  
3 tablespoons vinegar.  
1 teaspoon salt.  
1/4 teaspoon pepper.  
2 cups mixed cooked vegetables, finely cut.

Dissolve gelatin in boiling water.

Add tomato juice, vinegar and seasoning. Chill. When slightly thickened, fold in vegetables. (A mixture of several of the following may be used: Celery, green beans, green or yellow pod beans, asparagus tips, onions or carrots.) Turn into small individual molds. Chill until firm. Unmold and serve with meat course. Serves 8.

## SPECIAL DEVIL'S FOOD CAKE

1/2 cup shortening.  
2 cups sugar.  
4 eggs.  
1 cup milk.  
2 1/2 cups flour.  
3 teaspoons baking powder.  
3 squares chocolate.  
1 teaspoon vanilla.

Cream shortening and sugar together. Add egg yolks well beaten. Sift together dry ingredients and add alternately with the milk. Add melted chocolate and vanilla. Lastly, fold in well-beaten egg whites. Pour into 2 well-greased square cake tins and bake in moderate oven not too hot (375 degrees Fahrenheit) for 30 minutes. Use your favorite icing.

## Roads Made Of Steel

Roads of steel in England are scheduled for the future if one such road built on the King's Road, Chelsea, proves practical. It is a continuous strip of rough steel, whose interfaces are filled with concrete. On the surface, however, the metal grid is directly exposed to the wheels of vehicles. It is expected to last twice as long as any other road.

## Minard's for Insect Bites.

## Revenue From Livestock

Indians sold approximately \$250,000 worth of cattle last year and still have around 25,000 head on the different reservations. The quality of the cattle is improving rapidly and Indian live stock men are in good financial condition.

## WRIGLEY'S

Life-like good golf—is made up of many little things each one which helps the score.

Better digestion—stieder nerves—clearer brain, are all factors that count and are gained from the use of Wrigley's.

## Aid For Faithful Servant

Man Who Travelled With David Livingston Gets Pension

As the result of an appeal for funds to aid Matthew Wellington, the faithful servant of David Livingston, the explorer-missionary, he is assured of an income of \$5 a week for every year. Wellington is 85 and lives at Mombasa, Africa, so that the pension will care for his simple needs. Matthew was with his master at his death, helped to embalm the body, and accompanied the coffin from the wilds to the African coast. The response to the appeal from Scotland was gratifying, and the money is now being sent to the old man through the Resident Commissioner of Mombasa.

Nothing As Good For Asthma. Asthma remedies come and go, but every year the sales of the original Dr. J. Kellogg's Asthma Remedy grow greater and greater. No further evidence need be asked of its remarkable merit. It relieves. It is always of the same unvarying quality which the suffered from asthma know well. Do not suffer another attack, but get this splendid remedy today.

## Treaty Money Paid

Five dollars apiece in treaty money was handed out to 481 Indians on June 3, at The Pas, Manitoba, as the Union Jack fluttered over the treaty-ceremony. Two Indians went for a taxi-drive and scores frequented the five-and-ten-cent store. The natives made merry at the reserve, singing Indian songs and dancing the Red River Jig.

## Old Press Moved

The Nogales International's 53-year-old newspaper press has left Arizona. It has been moved across the International line to Nogales, Sonora, having been sold to Judge Francisco Battiz of that city.

## Extensive Program Has Been Arranged For This Season's Work In North

The growing importance of Canada's Far North is indicated in the extensive program now being arranged by the Department of the Interior through its North West Territories and Yukon Branch for its work in the Territories during the coming season. The activities and projects contemplated include arrangements for the reception and establishment of the Government reindeer herd, the enlargement of the medical service, the organization of the warden patrol in the Thelon Game Sanctuary, the extension of the 1930 voyage of the Department's expeditionary ship, and the opening to prospectors of the Coppermine mineral reserve.

During the coming year most of the areas in the Northwest Territories where there are trading posts and settlements will be under active medical surveillance. Dr. Livingston, senior medical officer, has already left for Churchill from which point he will travel by dog team to Chesterfield, where the Department of the Interior has built a house for his accommodation. He will visit all the Eskimo settlements en route. With Chesterfield as a centre, Dr. Livingston will be in touch with Baker Lake and the other important posts in the districts on the west side of Hudson Bay. He will remain in charge of this post until the arrival of the Department's patrol ship "Beothic" early next autumn, when he will be replaced by the ship's doctor. Dr. Livingston will return to North Sydney on the "Beothic" and will later proceed to Fort Smith, N.W.T., which is the Department's headquarters for the District of Mackenzie. At this point there is a large mission hospital, and he will take over the duties of the retiring medical health officer and have general supervision of the medical work of the district. The scattered nature of the medical work in the Mackenzie delta and Arctic coast to the east and west, under Dr. J. A. Urquhart, stationed at Akavik, has necessitated improved means of transportation, and to meet this a motor hospital boat has been built at Edmonton and with the opening of northern navigation will be taken to Fort Smith. From this point it will proceed under its own power to Akavik and at the same time carry Mr. J. F. Moran, chief inspector, on his annual tour of the Mackenzie district. Other departmental medical officers in the Territories are Dr. R. D. Martin, at the mouth of the Coppermine, and Dr. H. A. Stuart, on Baffin Island.

Preparations for the reception of the reindeer herd of 3,000 head, now on its way overland from Alaska, will arrive early in 1931, will be completed this year. Mr. R. T. Forsid has arrived at Akavik by aeroplane and will supervise the erection of corrals and buildings in the range east of the Mackenzie delta.

The Coppermine mineral reserve will be opened for staking on July 1, and Major L. T. Burwash, who made an inspection of this field in 1929, will go in by aeroplane early in the season so as to be on the ground as soon as possible. Later, if conditions permit, he will fly to King William Island to carry on further investigations with regard to the fate of Sir John Franklin.

The organization of the regular patrol of the Thelon Game Sanctuary for the protection of wild life, particularly the musk-ox, will be completed this year. Mr. W. H. B. Hoare, who returned last autumn after a twenty months' investigation of the area, will go north to superintend the erection of warden cabins at the east and west ends of the sanctuary and the establishment in the reserve of wardens and native helpers.

This year's cruise of the Department of the Interior's expeditionary ship "Beothic" will be slightly different from that of former years in order that she may enter Lancaster sound after the ice has moved out. If conditions then permit she will proceed to Winter Harbour, Melville Island and renew the supplies in the cache established by Captain Bernier, of C.G.S. Arctic, in 1908-9, which proved of such service to the northern party of the Canadian Arctic Expedition of 1913-18, and to Inspector Joy of the Royal Canadian Mounted Police during his notable winter journey of 1,800 miles, in 1929.

In addition to her usual work in carrying relief personnel and supplies to the various posts in the Canadian Arctic archipelago, the "Beothic" will take to Lake Harbour, on the southern shore of Baffin Island, sufficient lumber and supplies to erect a house for a resident officer there. This house will be occupied for the next

two years by Mr. and Mrs. J. Dewey Soper. Mr. Soper will continue his investigations respecting the blue goose and its nesting ground, will survey certain parts of the shore line, and make observations in regard to terrestrial magnetism. Mrs. Soper, who is a trained nurse, will be of great assistance in cases of illness among the natives.

The services above mentioned are, it will be noted, nearly all additions to the administrative work of the North West Territories and Yukon Branch, which has been steadily growing for many years, and they show both the increased interest which citizens are taking in Northern Canada and the forethought with which the Department of the Interior is exercising to ensure that the needs of the Territories will be adequately met.

### Judgments Act Reciprocal

**Ontario Makes Law Court Pact With Province Of Saskatchewan**

The reciprocal enforcement of the Judgments Act is now in operation between Ontario and Saskatchewan, according to an announcement made by Attorney-General W. H. Price.

The act was recommended in 1928 by the Dominion committee on uniformity of law and was passed by all the provinces last year, but was made subject to proclamation by order-in-council.

Ontario put through the order to make it effective on May 9, and Saskatchewan proclaimed its act on May 26. It will now be possible for a business concern to get a judgment in Ontario and collect from a person living in Saskatchewan without the necessity of suing on judgment, as was heretofore the practice.

Colonel Price stated that legislation, in his opinion, was of far-reaching benefit, and he expressed hope that the other provinces would soon see their way clear to follow in the course set by Saskatchewan. The committee on uniformity of law expressed the opinion, at the time they recommended such legislation, that general adoption and operation of it was most desirable.

### Cattle In Prize Class

The highest individual price and the highest average price for the cattle from any one contributor at the recent National Holstein sale at Toronto, were secured by the six animals sent by the Canadian Pacific Supply Farm at Strathmore, Alberta. A four-year-old heifer from the herd brought \$1,525, the highest price of the sale; while a young bull brought \$675, the highest prize in the bull class. The six animals averaged \$658 as compared with \$327 for the average of the 64 animals vended at the sale.

### Built First Automobile

Andrew Lawrence Riker, 81, designer and builder of the first gasoline-propelled automobile, died recently at Fairfield, Conn. In 1884, he designed and built his first automobile, an electric tricycle. He introduced the sliding gear transmission, steel frame and the four-cylinder vertical motor with high tension ignition.

The automotive industry in the United States used 47,000,000 yards of upholstery cloth in 1928.

Labrador, often thought of as a land of the far north, is in reality no farther north than Scotland.

(By Annabelle W. Wellington.)

2947

One of the most practical fashions of the season for the school miss of 6, 8, 10 and 12 years is illustrated in navy blue wool crepe with beige crepe belt and cuffs. The scalloped collar and cuffs are accented with vivid red taffeta bias binding. Matching shade red bone buttons emphasize side scalloped closing of blouse. Red suede belt completes this charming outfit.

Style No. 2947 is made at a remarkable saving, for in the 8-year size, it takes but 2 yards of 40-inch material with 1 yard of beige contrasting. The blouse has a one-piece back; front in two sections. Seamed at sides and shoulders. The two-piece skirt is seamed at sides and pressed into inverted pleats at either side of front and stitched to blouse. It is now practically ready to set sleeves into armholes and stitch collar at neckline.

Wool jersey in French blue with picture pattern in geometric designs, in red and white, beige, white, pink, red and white gingham check with plain white linen, and tan and apricot tulle fabrics.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

# Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude salts. Use what your doctor would advise.

The "alkali" is Phillips Milk of Magnesia. For 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes excess acid in the stomach. The result is immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is superior to all others.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## WORLD HAPPENINGS BRIEFLY TOLD

Sir John Simon, head of the recent British commission to India, plans to return to India, August 3, aboard the "Duchess of Athol."

French ports of Calais, Boulogne, Havre, Dieppe and Cherbourg are reported well satisfied that the British Government has decided against a tunnel under the English Channel.

Carol Caraiman, citizen, has become King Carol II. of Rumania, by a vote of the Rumanian parliament, which lacked only one of being unanimous.

Andrea Macedo, a Portuguese, sailed from Morocco, June 8, for New York, in a 20-foot sloop named the "Afuia." He was the lone passenger, sailor and navigator.

Anny Johnson, whose lone flight to Australia has roused the British, has been given \$50,000 by Lord Rochester's Daily Mail in recognition of her performance.

Two hundred members of the Agrarian Producers' Union, of the Argentine, will arrive at Victoria, B.C., on September 14, to commence a tour of Canada.

Passenger trains on the Continent are fastening equipped with radio receivers for passengers. The latest is the train from Havre to Paris. Passengers can hire headphones and listen in to Eiffel Tower Radio, Paris, or radio station 5XX.

The Prince of Wales and Prince George have both entered Canada in the King's cup air race to be held July 5. Squadron Leader Don, who has been the Prince of Wales' pilot on recent flights, is expected to fly the royal heir's entry.

For the first time an aeroplane will be used for inspection of Indian agencies and reserves in the Mackenzie River district. Inspector C. C. Parker, of the Department of Indian Affairs will leave Waterways, Alberta, early in July, his most northerly objective being Herschel Island.

### Western Canada New Mecca

#### Request For Information Received From United States Motorists

Motorists in many parts of the United States, having exhausted the possibilities of travel in Eastern United States, are now looking to Western Canada as their new Mecca. This was the frank statement in a letter received by the local office of the Saskatchewan Motor Club from its Southern Illinois affiliation, the Auto Club of Egypt, which urgently requested a general supply of maps, brochures, holiday and road information concerning Saskatchewan.

#### A Century Old Song

That fine old song "Rocked in the Cradle of the Deep"—a perennial challenge to bassos—was written by Emma Willard, nearly one hundred years ago. Emma, an American poet of note in her day, wrote it on July 14, 1831, after a violent storm at sea during a voyage she made aboard the good ship "Sally," says Thomas F. Madigan (in "Word-Shadows of the Great"). So that she was one person at least who went to sea before writing about it.

In the first three months of this year 10 British army aviators were killed in five crashes.

Florida has a longer coast line than any other state in the Union.

**Rheumatism GONE**  
"After years of rheumatism, now in perfect health, I am a different person. Thousands with rheumatism with 'Fruit-a-diet' have found relief and cessation and over-all health. Nerves quiet. Get 'Fruit-a-diet' found everywhere today."

W. N. U. 1842

### Jubilee Impressions

#### A Few Reasons Why Manitoba Is Holding Celebration

The enthusiasm with which the people of Manitoba are preparing to celebrate the Diamond Jubilee of the Province, on July 15 next, might lead an outsider, unfamiliar with our progress and development, to enquire what it was all about. He would need to be told that the Province was formally admitted into the Canadian Confederation on July 15, 1870, and that the present generation was showing its pride and satisfaction at what had been accomplished in the sixty-year period.

The outstanding fact in connection with Manitoba's history as a Province is that her people have practically achieved the impossible in the production of foodstuffs. One need not go far back into the annals of the nineteenth century to find a positive and emphatic declaration of opinion on the country's resources, from a man whose position should have given him the right to speak with authority. He was foolish enough to insist, on more than one occasion, that wheat would never grow in any place more than ten miles from the Red River. His cue was taken up by many lesser "authorities," and the whole territory was apparently doomed and damned as a source of cereal food supplies. What has been the real situation? Manitoba wheat has secured a firm position of leadership in the markets of the world, and has held that distinction for more than forty years. Without desiring to reflect in any way upon the fertility of the Red River district, it may be added that most of the wheat is produced much more than ten miles from that famous waterway. Oats and barley add their testimony in rebuttal of the foolish prophecies of men who should have realized the value of silence. The cultivation of grain, in fact, has provided the foundation for Manitoba's progress. Farmers who knew their business came here from other lands, mostly from Ontario, to take a look at the soil and examine the other elements of crop production. In nearly every case one look was enough. Those who stayed and worked with energy and determination, succeeded in establishing forever the reputation of this Province as a centre of high-class agricultural prosperity. They were not daunted by weird tales of visitations of grasshoppers, drought, frost, hail, floods and all the other torments of the "crape-hanging" era. Nor did they flinch on the rare occasions when they encountered these torments, singly or in combination. They persevered and won through; perhaps they did not realize at the time that they were "achieving the impossible."

The dire predictions regarding the possibilities, or rather the impossibilities, of grain production were repeated and multiplied when it came to the consideration of other items relating to human sustenance. They were, it seems, to be disregarded as possible factors in the economic life of the new Province. Could live stock, for instance, be expected to survive in a land where even the buffaloes, with unlimited grazing areas at their disposal, found it difficult to exist? Absurd, according to the wiseacres of that day. But the agricultural pioneers did not agree with them. They "knew their onions," but they knew even more about their hay and grass, and chopstuffs, and strawstacks and shelter and stabling. They knew, too, that if a little care were exercised in choosing the proper breeds, and some degree of special attention were accorded the stock during the comparatively short period of abnormal winter weather, good results could be obtained. The justification of their faith is to be found in the prize distributions at leading stock fairs throughout Canada and the United States during the past thirty years. Manitoba cattle

have held their own with the best that could be produced anywhere. It is a matter of gratification to the people of Manitoba that her first citizen, his Honor the Lieutenant-Governor, James Duncan McGregor, has risen to his eminent position in the community largely through his success as a breeder of pure-bred cattle. That success has been due to intelligence, persistence, hard work and a refusal to believe that "it couldn't be done."

The story is the same in regard to other phases of farm activity. Who is there among the middle-aged people of Manitoba who does not remember the day when butter from Eastern Canada was considered essential to human existence here? A quarter of a century ago it was almost impious to suggest that this Province should manufacture its own butter. Today the Manitoba product is known and appreciated all over Canada, and in many foreign markets as well. During the past ten years it has won most of the cups and prizes at leading exhibitions in every part of the Dominion, and has set a standard in the manufacture of butter which is a model for creameries in all the other provinces. As for eggs, the leading authority in the Dominion is on record with the statement that for excellent flavor and food value the product of the Manitoba hen is invaluable. Honey represents another instance where local achievement in the matter of quality has crowded out the foreign article. The canny housewife who buys a pail or jar of Manitoba honey knows she is getting the best that is to be had.

The refusal to lie down or retreat in the face of serious problems has always been a characteristic of Manitoba pioneers, but luckily that fine spirit persists in most of their descendants. Courage, patience, enthusiasm, perseverance and idealism, coupled with a lavish expenditure of muscular energy and perspiration, has gone far towards giving Manitoba a proud a place in Canada and in the Empire. Incidentally the prophets of famine and starvation have been put to shame. That in itself is worth while—Old Timer.

### No Longer a Mystery

#### New Zealand Trade Commissioners Knows Why Canada Imports Sausage Casings

"Until I went to Canada in 1926, I could never understand why the Canadians spent so much money in importing sausage casings from New Zealand—about \$70,000 pounds a year it is now," said Mr. J. W. Collins, New Zealand Trade Commissioner to Canada, at the Auckland Chamber of Commerce luncheon.

"I found the explanation when I landed at Vancouver, and went to a football match. I was accosted by a small boy, who solicited business in these words, 'Hot Dogs, 10 cents, Good for folks.'

"In my travels through Canada I soon came to realize the enormous production and sale of the so-called 'hot-dog,' and I did all I possibly could to increase the production of that delectable food. When I am among the Canadians again, I am going to use my best efforts to induce them to put in a bit of butter with the bread and mustard that always accompany the 'hot-dog.' If they do, it will mean at least another 10,000 tons a year of sausage casings from New Zealand."

Morning Herald, Auckland.

### Protection For Air Pilots

#### Royal Air Force Is Introducing Fire-proof Clothes and Wings

Fireproof clothes for airmen and fireproof wings for their machines are to be introduced in the Royal Air Force. It is expected that as a result the tragic toll of deaths following airplane crashes will be reduced to a minimum.

A cheap and easily made fireproofing solution has been discovered for treating clothes and other fabrics.

It is a mixture of borax and boric acid, and is said to be so effective, that when four-ounce cotton fabric was treated, it could not be ignited by a naked flame.

The Fairies Co-ordinating Research Committee has already approved the solution's use.

#### Fast Travelling

George McDougall, a member of the Regina Flying Club, left for Winnipeg one afternoon recently, with W. Corson, in a Moth plane arriving in Winnipeg at 7 o'clock. Half an hour later he climbed aboard the mail plane for Regina arriving at 10:30, having made the round trip in eight hours.

"You're a dear, sweet girl," sighed the despondent son. "God bless and keep you! I wish I could afford to."

One shipyard in Glasgow, Scotland, now is employing 7,000 men.

### Cutworm Outbreaks, 1930

#### Are Present In Exceptional Numbers and Over Wide Areas (Kenneth M. King)

The cutworm outbreak which was predicted for this spring is materializing in very serious proportions and over wide areas. Two types of cutworms are involved:—The Red-backed cutworm group generally throughout the park belt, and the pale western cutworm in a few districts as detailed below.

It is important to distinguish between these two kinds, because of a marked difference in means of control. These cutworms are present in exceptional numbers, and the early hatching and generally dry conditions of this season are conducive to a heavy rate of damage, although the coolness of the spring has been somewhat unfavourable to the cutworms.

Districts Involved:—The Red-backed cutworm seems to be generally abundant this year in the bush country, throughout the park belt, and into the adjoining margin of prairie land. It is particularly destructive in gardens and to the broad-leaved crops, though cereals may also be seriously damaged.

The pale western cutworm occurs in two areas:—(1) It is extremely abundant this year in south central Saskatchewan, in the heavy soil of the Regina plains. The outbreak definitely extends from Balcarres, inside Head and Sintaluta on the east to Moose Jaw, and possibly to Moose and Central Butte on the west. Southwardly, it probably extends to the International Boundary, in the heavy soil. (2) An outbreak is also expected in extreme western Saskatchewan, especially around Ahska, extending possibly to Madison, on the east, and Maple Creek to the south.

How To Distinguish:—Cutworms can be readily distinguished by their short round bodies and their habit of cutting off the plants completely at or near the surface of the ground. The only other spring pest of similar type of damage is the wireworm, which can readily be distinguished by its smaller, hard, bright shiny yellow body, and the fact that it attacks the seed and lower stem, seldom cutting off the plant completely.

It will be noted that the two types of cutworms mentioned may both be abundant in certain districts. The red-backed cutworm may be readily distinguished by the definite coloration—usually a dull red—upon the back, and the distinct lines lengthwise of the back. The pale western cutworm is almost colorless, except for the slight color given by the food and other contents of the body; it usually has a very grey appearance.

Control Measures:—Red-backed Cutworm: Poisoned bran bait is a very effective and practical means of control, either in gardens or in large fields, for all cutworms of the red-backed type. The important thing is to watch the fields closely and use the bait in time to save the crop. If a field is ruined, use of the bait will permit immediate re-seeding safely. Three things are essential in using this bait for cutworms:—(1) The bait must be put out in the evening,

since it is only at night that these cutworms come above the service to feed. (2) A warm night should be chosen; if the thermometer registers less than fifty degrees Fahrenheit at sundown, it will be too cool to secure a good kill of cutworms. Best results are secured when the surface soil is moist. (3) The bait should be evenly spread over the surface, since the worms must come in contact with the bait in order to eat on it; a very thin application, 20 to 30 pounds per acre, is sufficient.

The bait is prepared as follows:—Bran, 25 pounds; Paras, Green, 1/2 pound (or white arsenic, 1 pound); cheap molasses, 1 quart; water, 4 or 5 quarts.

The dry bran and poison are first thoroughly mixed together (keeping mouth and nose covered with a damp cloth, during the process). Molasses should be dissolved in the water, and this mixture then slowly stirred into the poisoned bran until it is thoroughly moistened and free from lumps. CAUTION:—Keep any unused bait or poison out of the way of children or animals.

Pale Western Cutworm:—Poisoned bran bait has not proved effective against the pale western cutworm; (hence the special importance of distinguishing it from the red-backed kind). In fact, there is very little that can be done, where fields are heavily infested by the pale western cutworm, except to avoid waste of soil by delaying re-seeding until the cutworms have ceased feeding. These cutworms migrate very little, even when a field has been eaten bare, and cases are known in which 4 or 5 seedings have been destroyed in the same field in one spring. This year, re-seeding will probably be safe about the end of June; this is, of course, too late for most crops, but barley may perhaps be used, or oats for green feed or hay.

Where only parts of a crop are affected by this cutworm, the remainder may be partially protected by ploughing a deep furrow around each undamaged area.

Reports and Queries:—Circulars giving fuller information about either or both of these types of cutworms or the plant completely.

Immediate reports of any important outbreaks which may occur in your district would be welcome.

Reports or queries may be addressed either to the Department of Agriculture, Regina, or to the Dominion Entomological Laboratory (University of Saskatchewan), Saskatoon.

#### Large Entry From B.C.

Canada will have on display at the Crystal Palace, London, England, during the fourth World's Poultry Congress, July 22-30, a grand total of 863 birds, with 452 exhibition birds and 24 production birds. The remainder will be made up of ducks, geese, and pigeons. A few special good rabbits are also being sent forward. British Columbia's entries total nearly half of the production breed birds.

A Nevada man has invented an automobile attachment that flashes a lamp on the instrument board of a car when a tire is punctured.

**I Minute Ends Itch of ECZEMA**  
"SOOTH-SALVA" AMERICAN DOCTORS  
"Baby had terrible eczema. Sooth-Salva ended it quickly. My baby is now a healthy, happy child." Mrs. J. Laurent, St. John's, N.B., says. "I applied Sooth-Salva to my baby's eczema and it disappeared in a minute. Eczema goes for good in few days. Sooth-Salva becomes clear, smooth. All disappear."

### SUNDAY SCHOOL LESSON JUNE 22

#### THE RISEN LORD AND THE GREAT COMMISSION

Golden Text: "Go ye therefore, and make disciples of all nations."—Matthew 28:19.

Lesson: Matthew 28:1-20.

Devotional Reading: Psalm 116:1-9.

Explanations and Comments

The Empty Sepulcher and Its Message, verses 1-6.—The Gospels do not describe the resurrection; they repeat it. The resurrection is the central fact of the visit of Mary Magdalene and the other Mary to the sepulcher late on Saturday, the Jewish Sabbath, as Sunday, the first day of the week, began. From the sepulcher, Mary Magdalene went to the Sea of Galilee, who had been freed from "seven demons." Luke 8:2, and who is often wrongfully confused with the woman who was a sinner. The other Mary was the mother of James, Mark 16:1. These two had been present at the crucifixion and the burial. Matthew 27:57-61.

Matthew 28:1-6. He who had been a great earthquake, and an angel rolled the stone away and sat on it. His appearance was dazzling like lightning, and his garment white as snow. The earth quaked and the watchers trembled and became as helpless as dead men. The Greek word for angel means "one who is sent as a messenger." The angel "answered" the look of amazement and fear of the women and said, "Fear not, for I know that ye seek him who hath been crucified." The "for" gives a reason for the soothsaying of the address. The angel "was glorified as friend of the Crucified." A. B. T. Then he added the amazing news: "He is not here; for He is risen even as He said." See Matthew 12:40; 16:21; 27:61. "When the earth quaked, see the place where the Lord lay." The condition of the tomb as seen by Peter and John is described in John 20:5-7.

The Glad Message, verses 7-8.—They were not to stand long in mute amazement, but were to carry the glad news to others: "Go quickly, and tell His disciples: 'He is risen from the dead.' And lo, He goeth before you to Galilee, and there shall ye see Him." Then he said, "I have told you." Recall His promise to the disciples Matthew 26:32.

"The Lord is risen indeed. He is here for your love, for your need."

Not here in the grave, nor the sky, But here where we live and love—And true that word was said: "Why seek ye the living among the dead?"

Richard Watson Gilder.

The Final Interview and Commission, verses 16-20.—An authority has given the command: "Go ye therefore, and make disciples of all nations, baptizing them into the name"; i.e., giving them the name of the Father, and of the Son, and of the Holy Spirit, teaching them to observe all things whatsoever I commanded you."

## Make Your Windows Pay

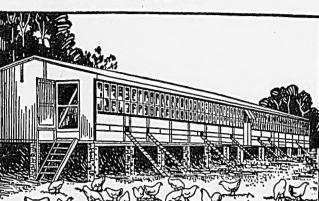

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

### WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

**Distributors: JOHN A. CHANTLER & CO., LTD.**  
51 Wellington St. W.  
TORONTO, ONT.

USE  
WINDOLITE  
IN  
BROODER  
HOUSES  
LAYING PENS  
DAIRY BARN  
SUNBEDS  
ETC.

## LARGER VOLUME OF IMMIGRATION FROM BRITAIN

London, England.—Despite a decrease in the volume of British emigration to other parts of the Empire in 1929 as compared with 1928, emigration to Canada showed a substantial increase, according to the report of the overseas settlement committee, made public today. The report is confined to a statement of events in 1929 and it is presumed the general policy of the Empire governments with regard to overseas settlement will be discussed at the Imperial Conference in October.

During 1929 the total number of emigrants from Great Britain and Northern Ireland to non-European countries was 143,686, compared with 136,834 in the preceding year. Notwithstanding this increase in the total migration overseas the total who went to other parts of the Empire was 106,900 in 1929.

The figures for 1928 were 108,982. The number assisted to go overseas under the Empire Settlement Act increased from 47,855 in 1928 to 72,213 in 1929.

The substantial increase in the movement to Canada was due to the ten pound rate, the report states. The total movement to Canada was 65,558, compared with 46,709 in 1928. There was a decrease in the movement to Australia.

The report describes the scheme for settling 3,000 families on farms in Canada, which started in 1924, and is now completed, as the most successful large scale enterprise yet undertaken under the Empire Settlement Act.

### New Order For Stockyards

#### May Be Permitted To Do Business In Restricted Areas

Ottawa, Ont.—Public stockyards were excluded from the restrictions placed on a designated area while testing for bovine tuberculosis is conducted, by an order-in-council passed by the Federal Government. It will mean that the Minister of Agriculture may issue an order that a public stockyard in a restricted area may be permitted to carry on its business just as if the area had not been established.

Saskatoon is the only place in Canada affected at the present time, officials of the Department of Agriculture said. While no order had been passed affecting the stock yards, in that city, one is expected, they said.

When tests of bovine tuberculosis are being conducted in a specified area, there can be no movement inward except that of tested cattle. Stockyards protested that this worked an injustice on them and that it seriously affected their business. This led to the order-in-council which excludes them from the restrictive terms.

### Contracts End In December

#### Married Women Will Not Be Employed in Winnipeg Schools

Winnipeg, Man.—Married women will not in future be employed as teachers in Winnipeg schools, it was decided at a meeting of the school board.

Married women now employed will be given notice that their contract will terminate December 31, 1930, unless exceptional circumstances prevail to warrant continued employment after that date.

It was also decided, in view of the existing-unemployment situation, that the board will "record its disapproval of the acceptance by its employees of remunerative vocational employment."

#### Apply For Oil Leases

Prince Albert, Sask.—Saskatchewan's latest oil boom is apparently gathering momentum. The Dominion land office here has received two applications for oil leases on two sections of land in the vicinity of Kakwa, 17 miles south of Hudson Bay Junction, where oil and natural gas was struck by water well drillers recently. The applications have been forwarded to Ottawa for approval.

#### Plane Carried Huge Sum

Miami, Fla.—An airplane bearing two million dollars in cash arrived here from Jacksonville to meet, financial situation caused by the closing of the Bank of Bay Biscayne and four others. President Rohlf of First National announced the money would be used through other Miami banks to pay off all concerned in the closed houses.

W. N. U. 1842

### Underworld Haunts Raided By Police

#### Six Hundred Suspects Are Arrested By Chicago Squad

Chicago, Ill.—Nearly 600 alleged hoodlums were rounded up as a special "strong arm" police squad slashed into underworld haunts, bent on ridding Chicago "for all time" of criminals.

Slurred to drastic action for solution of the murder of Alfred ("Jake") Lingle, Tribune reporter, and other gangland slayers, the squads, armed with shotguns, revolvers and tear bombs, crashed the thug hangouts with a vengeance. Patrol wagons, loaded, began arriving at police headquarters in a stream shortly after 10 p.m. and at midnight there was no sign of a let up.

The prisoners poured in so fast that the "attaches" of the bureau of identification were swamped and extra details were called on to assist in the work of booking.

As soon as word of the raids was circulated, a veritable swarm of attorneys, bondsmen and others interested in seeking liberation of the suspects also descended on headquarters, but their efforts came to naught, half being refused in each instance.

### Jury Acquits Oliver On Assault Charge

#### Son Of Ex-Premier Of B.C. Found Not Guilty

Vernon, B.C.—It took less than 20 minutes for the assize court to bring in a verdict of not guilty against Charles Oliver, son of former Premier John Oliver, charged with assaulting Dr. V. E. Latimer in Pentiction, last November 25. It was almost a foregone conclusion following the address of Chief Justice Morrison to the jury that Oliver would be acquitted and a murmur of satisfaction ran around the packed court room when the verdict was given.

Only four witnesses for the crown were examined and little time was lost by Hon. R. L. Maitland, K.C., chief defence counsel in cross-examination. Mr. Maitland put in a defense but immediately opened his address to the jury.

The jury retired at 3:40 p.m. and rendered their verdict at 4:00 p.m.

### Legion Objects To Fiction War Books

#### Condemns Those Not Founded On Actual Facts

Cardiff, Wales.—War should in no circumstances be made the subject of works of fiction, was the view expressed at the annual conference of the British Legion here.

War books come in for a good deal of criticism and a resolution was adopted condemning books in which the author does not draw on actual facts and personal experiences.

The elimination of war as a subject for fiction was urged as a measure of respect for dead and maimed soldiers.

Another resolution urged the council of the Legion to take steps to counter the "insidious propaganda" contained in books which slandered the character of Great Britain and belittled the principles for which she entered the war.

#### Greeted By Home City

#### Hon. R. B. Bennett Receives Rousing Welcome In Calgary

Calgary, Alta.—Hon. R. B. Bennett had a large crowd at his western home after firing the opening gun of his election campaign at Winnipeg, followed by a second speech at Regina. The Conservative leader arrived in Calgary at a late hour, but a large crowd was on hand to greet him at the station and with the opposition chieftain success in his campaign.

The assemblage cheered the Conservative leader time and again, and they lined up to shake him by the hand. The Calgarian Highlanders, of which Mr. Bennett is honorary colonel, were on hand and rendered music of welcome.

#### Survey Planned For Fall

Churchill.—Surveying of the townsite of Churchill will be done by the province of Manitoba, next fall, and construction will start next summer. Hon. D. G. McKenzie, Minister of Mines and Natural Resources, stated here.

#### Could Not Be Prevented

Boston.—No practical measures could have prevented or minimized the force of the 1929 stock market panic, according to Richard Whitney, president of the New York Stock Exchange.

### Settles Old Dispute

#### Nova Scotia Not Liable For Military Expenses During Strike

Ottawa, Ont.—The Province of Nova Scotia is "not liable to pay to His Majesty in the right of the Dominion all expenses and costs incurred by reason of the calling out of part of the active militia in aid of the civil power in Cape Breton" during June, 1925. This was the majority judgment of the Supreme Court of Canada, delivered by the chief justice here, Mr. Justice Newcome dissenting, and Mr. Justice Cannon finding that liability was "conditional."

This settles a five-year-old dispute between the Dominion and the province in which the Dominion claimed reimbursement in the sum of \$133,116.73—the cost of despatching and maintaining troops of the permanent force in Cape Breton during the coal-miner strike of 1925.

### Trans-Atlantic Trip Is Postponed

#### R-100 Not Coming To Canada Until End Of July

Ottawa, Ont.—The R-100 will not begin her trans-Atlantic trip to Canada until after the general election on July 28. This was conveyed to the Minister of National Defence, Hon. J. L. Ralston, in a cable received here from the British Government.

The postponement of the dirigible's flight is in accordance with an agreement between Canada and Great Britain.

The start of the flight will be made during the last three days of the cable said.

### PRINCE MAKES HIS FIRST WORLD- WIDE BROADCAST

Glasgow, Scotland.—Making his first world-wide radio broadcast, the Prince of Wales, standing on the famous Clydebank wharves on the occasion of the launching of the Canadian Pacific Railway liner "Empress of Britain," said the building of the new liner was the most important milestone in the recent history of the British mercantile marine.

The vessel, the Prince said, represented the last word in shipbuilding and as to appointments would be found to have no rival. The building of what the Prince described as "this wonder ship" was another sign of the sound imperial policy of the Canadian Pacific Railway.

His Royal Highness went on to say the C.P.R. had built 16 vessels in Great Britain since the war at a cost of \$20,000,000 and this when shipbuilding in Great Britain was at a low ebb.

Winnipeg, Man.—Radio brought the voice of His Royal Highness the Prince of Wales from Great Britain to Western Canada as clearly as he had been speaking directly through the microphone at one of the big Canadian stations. Listeners in all over the Prairie Provinces heard the heir to the British throne launch the new Canadian Pacific liner "Empress of Britain," his companion speakers being Lord Aberconway, British shipping magnate; and E. W. Beatty, K.C., President of the Canadian Pacific Railway.

Reception through CIRX at Fleming, Sask., and CKY at Winnipeg, two units in the chain of 91 stations in Canada and in the United States that received the broadcast over beam wireless from England to Yarmouth, Quebec, was excellent, and enabled newspapers to take verbatim the report of the speeches of His Royal Highness and Mr. Beatty.

#### Hon. R. B. Bennett Receives Rousing Welcome In Calgary

Calgary, Alta.—Hon. R. B. Bennett had a large crowd at his western home after firing the opening gun of his election campaign at Winnipeg, followed by a second speech at Regina. The Conservative leader arrived in Calgary at a late hour, but a large crowd was on hand to greet him at the station and with the opposition chieftain success in his campaign.

The assemblage cheered the Conservative leader time and again, and they lined up to shake him by the hand. The Calgarian Highlanders, of which Mr. Bennett is honorary colonel, were on hand and rendered music of welcome.

#### Survey Planned For Fall

Churchill.—Surveying of the townsite of Churchill will be done by the province of Manitoba, next fall, and construction will start next summer. Hon. D. G. McKenzie, Minister of Mines and Natural Resources, stated here.

#### Could Not Be Prevented

Boston.—No practical measures could have prevented or minimized the force of the 1929 stock market panic, according to Richard Whitney, president of the New York Stock Exchange.

### VISITING CANADA

#### Mrs. Ralph Booth, wife of Captain

Ralph Booth, who will pilot dirigible across the Atlantic to Montreal, is now staying in Toronto, Ontario.

### Ships Collide In Fog

#### Many Lives Lost When Passenger Steamer Rams Oil Tanker

Boston, Mass.—Flaming oil, spouting from the depths of a stricken oil tanker, believed to have been the "Pithis," of Fall River, was thought to have claimed the lives of more than 40 persons aboard that ship and the passenger liner "Fairfax" collided with the tanker, when she eddied in Massachusetts Bay.

So suddenly did the tragedy occur that not a single survivor of the tanker was believed to have been saved in the fog-shrouded inferno which followed the impact.

At least a score of the "Fairfax's" passengers and crew were unaccounted for while the "Pithis" carried a crew of 19.

Aboard the big passenger liner scenes of wildest confusion succeeded the shock of the crash. Men and women, believing the ship doomed, huddled themselves into the sea only to perish amidst the raging oil which poured from the tanker in all directions. Others were burned in their berths by the white heat of the fire which seared the port side of the ship.

The flames which swept both craft melted their radio antenna and temporarily ended possibility of summoning aid. The tanker, afire from stem to stern, settled slowly into the water plunging from sight 20 minutes after the crash.

The flames which swept both craft melted their radio antenna and temporarily ended possibility of summoning aid. The tanker, afire from stem to stern, settled slowly into the water plunging from sight 20 minutes after the crash.

### Ship Receives Page Of "Evening World"

#### Was Sent By Radio And Picked Up Intact

New York.—For the first time a newspaper has been broadcast out on waves of ether and picked up intact by a steamer at sea.

The experiment was successfully concluded when the first page of the Evening World was sent to the United States liner "America," at the moment 2,310 miles from New York. The paper was sent by the Radio Corporation of America's new photo-radio apparatus.

A mysterious cylinder, with purple ink, spun out intact the newspaper page that had appeared on the side-walls of New York. Pictures and type were reproduced as clearly as the city, while the steamer was nearing her port of call, Plymouth, England.

Three Subs Launched

Barrow-In-Furness, Eng.—Three submarines for the British Admiralty—the "Regulus," "Regent," and "Rover"—were launched at one shipyard here within the space of 34 minutes.

#### First Bride on New Ship

#### Hon. R. B. Bennett Receives Rousing Welcome In Calgary

Calgary, Alta.—Hon. R. B. Bennett had a large crowd at his western home after firing the opening gun of his election campaign at Winnipeg, followed by a second speech at Regina. #### Could Not Be Prevented

Boston.—No practical measures could have prevented or minimized the force of the 1929 stock market panic, according to Richard Whitney, president of the New York Stock Exchange.

### Successor Not Appointed

#### Australia Has Not Yet Chosen New Governor-General

Canberra, Australia.—In well-informed political circles it is stated Lord Somers, governor of the State of Victoria, will act as governor-general of Australia for about six months after the departure of the retiring Governor-General, Lord Stirling, in October.

The reason given is that Premier Scullin has asked to have the appointment of Lord Somers, successor deferred in order to enable him to consult the Dominions office when he is in London attending the Imperial conference in October.

Some time ago the appointment of a native-born Australian to the post was mooted and the name of Rt. Hon. Sir Isaac Isaacs, chief Justice of Australia, was mentioned. Premier Scullin was told there was nothing to prevent the appointment of an Australian.

### Winnipeg Lawyer Going To Norway

#### Will Represent Government Of Canada At Coming Celebration

Winnipeg, Man.—James C. Berg, Winnipeg barrister and a prominent worker in Norse societies for many years, received word of his appointment by Premier Mackenzie King as representative of the Dominion Government to the celebration of the nine hundredth anniversary of the introduction of Christianity into Norway, to be held at Trondhjem, Norway, in July and August.

Mr. Berg is the son of one of the earliest Norwegian settlers in western Canada. Representatives of Saskatchewan, Alberta and British Columbia governments are expected to sail with Berg, early in July.

### Simple Service For Late F. E. Trautman

#### Many Attend Funeral Of C.P.R. Official At Fort William

Fort William, Ont.—Impressively draped were the funeral services for the late F. E. Trautman, for the last 18 years Canadian Pacific Press representative in Western Canada.

He was buried in the city where a large part of his career as a pioneer western newspaperman was passed as editor of the Fort William Times-Journal.

The cities of Fort Arthur and Fort William were officially represented as was the railway company and a large number of private citizens also paid their last respects.

Interment was made in the Mountain View cemetery.

#### Will Visit Native Land

#### Two Hundred and Fifty Icelanders Will Attend Celebration In

Homeland

Winnipeg.—Two hundred and fifty Icelandic residents of Western Canada, most of them from Minnesota, left here by special train for Montreal, where they will embark for their homeland to attend the millennium celebration of the Icelandic parliament.

They sail from Montreal on the Canadian Pacific liner "Montcalm."

Prominent in the party were Hon. M. G. Bjornson of St. Paul, who will represent the state of Minnesota at the celebration, and Captain Sigur Jonasson of Arborg, Man., a resident of Canada for 58 years who, despite his 78 years, was among the most enthusiastic of the group.

#### Settlement For Swedes

Stockholm, Sweden.—Some Swedish people, who fled from the Ukraine because of unsatisfactory conditions under Soviet rule and who came here with the idea of joining relatives in Canada, have already emigrated to the Dominion.

Arrangements for establishing the remainder in Sweden are proceeding satisfactorily. A public subscription, started for the purpose, resulted in about \$250,000 being raised and in addition a grant was made by Parliament.

#### Urge Second Term For Hoover

Fort Myers, Fla.—Thomas A. Edison told interviewers here that he would urge President Hoover to seek election for a second term. The aged inventor said "the United States government is the most inefficient big business organization in operation today," and he added he did not blame the president. The vast size of the business, he said, was responsible.

#### A Chain of Airports from Coast to Coast is Advocated by the Canadian Chamber of Commerce

### CROP REPORTS ARE WATCHED IN OLD LAND

London, England.—The truth about the Canadian wheat crop is anxiously awaited here because of despatches from Canada giving rise to the impression that there will be a shortage and that the price will be higher in the Old Country this coming winter.

The Winnipeg correspondent of The Daily Telegraph cables that Canada is faced with the prospect of another short wheat crop, adding "this important information was not obtainable from the Wheat Pool, because of their attitude that 'we told the truth last year and the world would not believe it; now the world can find out for itself.'

Reports, too, that the Canadian farmer resents being called a Shylock because he wants a price for his wheat.

This despatch to The Daily Telegraph contrasts with the optimistic statement of the Dominion bureau of statistics, and has left the public here in doubt as to what prospects really are.

If the Canadian wheat crop is short and the price of bread rises, there will be an outcry by the protectionists and the Empire free traders for an understanding with Canada, and they will use this fact to advocate protection against Canadian wheat in favor of Canadian.

### Mail Plane Badly Damaged In Crash

#### Two Passengers From Calgary Cut By Flying Glass

Moose Jaw.—An air "bump" under the left wing of a mail plane caused it to drop 10 feet to the ground, colliding with the flood light at the east end of Moose Jaw flying field, and flop onto its back. Two passengers, R. V. Price and F. A. Ogilvie, both of Calgary, and proceeding to the Lions' convention at Regina, were cut by flying glass.

The plane, Boeing CP-A10, was badly damaged, two wings, the tail plane and the engine mount being bent and twisted. Work of repairing the machine was commenced the next morning.

Major Thompson, superintendent in charge of the Western Airways plant at Moose Jaw flying field, stated the accident was unavoidable and that the pilot was in no blame for what had occurred. "It was just one of the bad 'breaks' which happen," he said.

They sail from Montreal on the Canadian Pacific liner "Montcalm."

Prominent in the party were Hon. M. G. Bjornson of St. Paul, who will represent the state of Minnesota at the celebration, and Captain Sigur Jonasson of Arborg, Man., a resident of Canada for 58 years who, despite his 78 years, was among the most enthusiastic of the group.

#### Settlement For Swedes

Stockholm, Sweden.—Some Swedish people, who fled from the Ukraine because of unsatisfactory conditions under Soviet rule and who came here with the idea of joining relatives in Canada, have already emigrated to the Dominion.

Arrangements for establishing the remainder in Sweden are proceeding satisfactorily. A public subscription, started for the purpose, resulted in about \$250,000 being raised and in addition a grant was made by Parliament.

#### Urge Second Term For Hoover

Fort Myers, Fla.—Thomas A. Edison told interviewers here that he would urge President Hoover to seek election for a second term. The aged inventor said "the United States government is the most inefficient big business organization in operation today," and he added he did not blame the president. The vast size of the business, he said, was responsible.

## Spectre Has Disappeared

### New Border Measure Removes Fictitious Armed U.S. Patrol

The grotesque spectre of ten thousand heavily armed men marching up and down the Canadian border to enforce the immigration and customs laws of the United States, never more than a spectre, has been fading rapidly for several months, and when the interstate commerce committee of the House reported a border bill, the ghost disappeared.

The bill, as reported, provides for no military force, as was at first proposed, but merely for unification of the customs and immigration patrols under the treasury. It makes it illegal for anyone to enter the country except at a designated point of entry, but the exception has been enlarged and the regulation made easier by inserting a clause under which people living on the border or in the "neighborhood or vicinity" will be allowed to cross freely.

The border patrol, contemplated in the bill, will consist of about 700 immigration agents and 800 customs men, combined in the one civil service force. Prohibition enforcement agents are not included in the force. Provision is made for enlargement of the patrol, if necessary, but no specific increases are mentioned.

The sole regulation upon which Canadian eyes might be turned with some apprehension, is that prohibiting entry except at designated points, and Ogden L. Mills, under-secretary of the treasury, is authority for the statement that a sufficient number of points will be named to take care of commerce across the border.

At present a person may cross anywhere and make a report to the nearest customs and immigration station.

### Makes Life Worth Living

#### Nothing Like World Says Heir To Million Pounds

The last thing John Arthur Dewar, of London, England, who became a millionaire when the contents of the will of his uncle, Lord Dewar, were announced, can think of doing is to retire from business.

"I you stop work you might as well be dead," he said, when notified he had been left a million pounds, etc. (legacy duty, by his uncle, the famous distiller and sportsman. "It is work that makes life worth living."

Dewar, who is 38 years old, added that he was old enough not to be excited about a million pounds, and said he hoped to carry on his uncle's racing stable.

### Refused the Bargain

#### Hotel Proprietor Not Anxious To Buy Dead Man's Shoes

A hotel man walked into a popular Broadway shoe store last night to buy a pair of shoes.

"I've got five pairs here you can look over and if you like them you can have them at a big discount. They were ordered by a fellow who died a few days ago, and of course, they're no good to him now," said the clerk.

The clerk showed the shoes. They were a bargain at the price. But the hotel man shook his head.

"No, I'll give you a profit," he said. "I never had a desire to walk in dead men's shoes," and he bought a pair that were so all they squeaked.

### Profitable Visitors

American visitors in Great Britain are estimated to spend as much as £15,000,000 in that country every year. That amount does not include any clothes, etc., they buy to take home again; it is what they pay for entertainment and service while visiting.

It is difficult to understand why they call it income tax when it means that everything is going out.

The giant frog of Africa, the largest species in the world, sometimes weighs more than ten pounds.

"Do you draw teeth without pain?"  
"Certainly. At first I was affected a little, but now I don't mind a bit."  
Gutierrez, Madrid.

W. N. U. 1842

### Old Tea Package Press Found

#### Device Used By Late Hon. Peter Larkin Forty Years Ago

The first press invented and used by the late Hon. Peter C. Larkin, forty years ago, in putting tea in round packages, was located in the grocery store of Hugh Cooke, Kingston, Ont., recently. Mr. Larkin, until his recent death, was Canada's High Commissioner in London, Eng., and for years called America's "tea king," was the first to sell tea in package form. For the purpose he invented a galvanized receptacle and did the work by hand.

Kingston was one of Mr. Larkin's favorite places when he toured the province as a travelling salesman for tea, and one of his friends there was the late James R. Henderson, who, with his brother, kept the Italian Warehouse, a local store which dealt only in the choicest of groceries.

Mr. Larkin wanted Mr. Henderson to go into partnership with him in the tea business. However, when Mr. Larkin's tea business increased to such an extent that he had to install machinery for packaging, the tea proprietor remembered his old Kingston friend by sending him as a souvenir of their days together the apparatus he first used in making tea in round packages.

This apparatus came into possession of Mr. Cooke who succeeded Mr. Henderson as proprietor of the old established house upon his death. Mr. Larkin had great faith in his tea package invention and prophesied that it would yield him a fortune some day, which prophecy was fulfilled.

### Deserves Consideration

#### Canadian People Should Prove They Are Not Grumbler

A Canadian writing from the United States points out a point of difference between the two peoples. He says that Canadians have a habit of putting the worst face on things; the Americans make the best of everything. He never hears Americans running down their community or their country. To the man living in it his community is the finest place in the land; if there are hard times it is said about them. On the other hand Canadians seem to take a delight in grumbling about how bad everything looks.

Canadians may be well advised to keep away from a false optimism; but at the same time it may be altogether too true that we like to grumble. Perhaps we could take a lesson from the people of the South. Their unfailing optimism and confidence in their country sets a fine example to the growing generation; the young American is loath to believe that he could go anywhere in the world and better his lot. It is quite probable that young Canadians, listening to the grumbling of their elders, get the impression that Canada is not a first class country and have an itch to go somewhere else.

This is a matter that deserves serious consideration and is worth discussion by the public. — Regina Morning Leader-Post.

### Definition Was Accurate

A patient who complained of digestive troubles was told by a specialist that he was drinking too much and would have to knock it off.

"Well," said the patient, "what am I to tell my wife?"

The doctor thought for a few minutes and then said, "Tell her you are suffering from syncope. That will satisfy her."

The patient did as he was told. "What is syncope?" asked his wife.

"I don't know," said the husband, "but that is what he said."

When her husband had gone out the wife looked up the word in the dictionary and found it means "irregular movement from bar to bar."

### Churches and Publicity

Whether newspaper publicity is valuable or embarrassing to church conferences was a subject briefly debated by the Toronto Presbytery. It depends a great deal upon what subjects are being discussed, but there can be little question that, on the whole, publicity should be a good thing for church activities in general. Or, to put it another way, church activities should be of the kind which cannot fail to attract.

### Opium Given To Children

Opium is only smoked in a few districts in India, but raw opium is eaten in most parts of the country, and over a great part of Central and Western India it is administered to babies to keep them quiet. This practice has increased alarmingly in certain industrial areas, notably the Benbey cotton mills where children up to three or four years of age are regularly "doped" while their mothers work.

### Older Men Are Needed

#### Business and Industry Depend On Their Leadership Says Henry Ford

Henry Ford believes "more than ever" that business and industry must depend upon the leadership of men in mature years. He stated that he had found no occasion to change his previously expressed opinion that if all the men of 55 years and older were removed from industry "there would not be brains enough left to carry on."

"This is no reflection upon the youth of today," he said. "I think that while they are different, today's youngsters are a fine lot and they decidedly are not headed for perdition. Moreover, they have greater opportunities today than the youth of 40 and 50 years ago."

Mr. Ford was asked whether he always had conceded the wisdom of age.

"You didn't think that back in 1894 when you began tinkering with your horseless carriage, did you?"

"I always had older men for friends and I always went to them for advice. I could cite them one after another. Old men understood my idea better than young men did. With mature years I realized more and more the value of that advice. I realized that in my youth I hadn't waked up yet," he replied.

Youth and age seek each other. Mr. Ford went on. "Youth must look to age for its education," he said, "and age educated youth because youth interests it."

### Problems To Be Solved

#### The Ones Connected With Airplanes Are Just Beginning

Society has not yet grappled successfully with the human life and health problems raised by the automobile. It should bestir itself in season to protect life and property from falling airplanes or objects falling out of airplanes, and it might first of all do what is easiest, insist that airplane motors be muffled and be kept muffled at whatever height or whatever regions. All these difficult problems will some day be solved, but by far the easiest time to do it is the beginning. The airplane is still only at its beginning. The death rate caused by the automobile is a warning that what the airplane may do in the way of destruction and disturbance unless the necessary remedies are applied.

### An Effective Silencer

At a dinner one of the speakers was exceptionally long-winded. At the end of half an hour the irascible chairman could stand the flow no longer. He clanged his bell violently and the orator was so surprised that he sat down without completing his last sentence.

A guest sitting next to the chairman whispered with a sigh, "I wish I had a bell like that at home."

Flappers of Australia have taken up the beautifying idea.

A new attachment to a washing machine makes ice cream.

### KILLED IN PARACHUTE JUMP

Kenneth Burgess, of London, Ont., who, in his first attempt at parachute jumping, was killed in a 2,000-foot drop over Dufferin field, Toronto, when his parachute failed to open.

### Trouble Well Worth While

#### Canada Should Not Lose Interest In Arctic, Says G. P. MacKenzie

For both monetary and sentimental reasons Canada should continue to take an interest in her Arctic possessions, George P. MacKenzie, officer in charge of the Arctic expeditions of the North-West Territories branch, said in addressing an Ottawa service club.

Everywhere he went he was faced with the question "Is all this trouble in the Arctic worth while?"

In the first place it was dangerous to state that any land area did not possess value, Mr. MacKenzie continued. Great quantities of furs were already obtained there. When the United States purchased Alaska for seven million dollars many criticized the scheme. The animal exports from there now were valued at 14 times the purchase price. What might lie beneath the soil of these Arctic islands nobody yet knows.

Mr. MacKenzie believed that there were strong sentimental attachments to the Arctic possessions. The Eskimos were worth while. In fact were a wonderful people and the happiest he had ever met. "It would be a sad commentary on our so-called civilization if they were left to shift for themselves," he added.

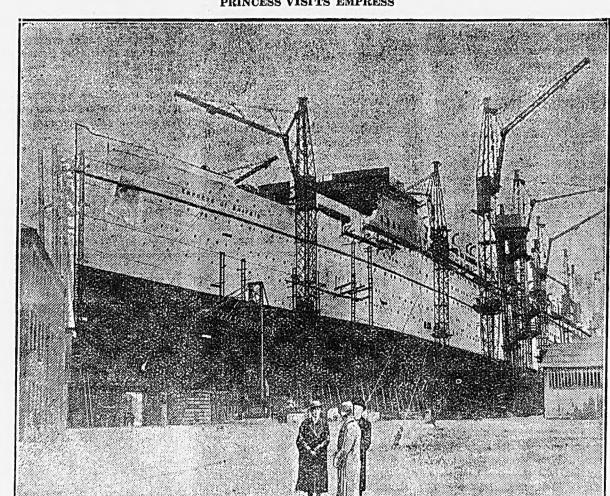

### Pen Will Be Preserved

The historic pen with which Premier Anderson, of Saskatchewan, signed the Natural Resources agreement, has now been silver mounted with a suitable inscription and will rest among the archives of the province. The inscription reads: "Pen used to sign the Natural Resources agreement, March 24, 1930." Incidentally the pen bears the inscription "Made in Great Britain."

### Information For Visitors

Some 25,000 maps of Alberta have been sent to the offices of the Calgary Board of Trade for distribution by the Alberta Development Board, southern section, to points throughout Canada and the United States. The booklet is full of pithy information of the sort valued by visitors.

### PRINCESS VISITS EMPRESS

The "Empress of Britain," mammoth new Canadian Pacific liner, appears to be much in Royal favour, for only will she have the distinction of being launched on June 11 by H.R.H. the Prince of Wales, but she recently had the honour of being inspected by Princess Mary, who paid a surprise visit to the ship talked about liner, which will be the largest vessel to be launched in Great Britain since the year 1914.

The Princess, shown above in the uniform she wears as Chief of the Girl Guides, made the 100-foot ascent to the decks in the workmen's electric hoist in order to inspect the vessel, and was loudly cheered by the workmen. After the visit to the steel hull, which had already been painted white, with a band of royal blue, Princess Mary inspected typical cabins and was delighted with the luxurious equipment and the use of Canadian woods for paneling and decoration. The ship's color design was first used when the liner "Medina" was thus painted to convey King George and Queen Mary to the great Durbar in India, in 1911.

### The Value Of Libraries

#### Books Are Of No Benefit To People Who Do Not Use Them

Premier Ramsay MacDonald, speaking the other day at Manchester, had something to say about the value of libraries that is worth noting. You can be observed, own much and possess nothing. Many a pauper with the indefinable quality of taste is far richer than the people who won the greatest amount of things. Mr. MacDonald's belief is that money has never yet been wasted on libraries and that investment in books is a capital investment, the capital of which never undergoes waste or deterioration.

But he warns against the mere establishment of a library and then neglect of its use. "A library not used with appreciation and taste," he says, "is a charnel house, and books merely arranged in rows on shelves are like the coffins of distinguished families placed in their shells in vaults."

The comparison is a pungent one, but it is not unjust. How many individuals, impressed with the idea that it is the thing to possess a library, just give a wholesale order for books—sets of them, rows of them, and, having set them up in a library, leave them virtually untouched for years? How can any such neglect be of the slightest benefit to the owner of such a library?

The man with a solitary shelf of well chosen books which he can read and re-read, and which are well-thumbed, is potentially far wealthier in spiritual goods than the man who possesses thousands of volumes and never takes a look inside them. A man should put as much care and thought into the selection of his reading as he does into the decisions that govern his daily business. There is nothing that will pay him more satisfying dividends in life.

### The Age Limit

#### Something Wrong When Men Is Old At Forty-Six

How old is "too old?"

Sociologists are growing worried because many industrialists are replacing middle-aged workers with young men. A man of fifty very often has a hard time finding a new job. In many quarters, evidently, a man is believed to be close to senility when he passes forty-five.

Most startling of all is the refusal of Captain John K. Davis to navigate the exploration ship "Discovery" on a voyage to the Antarctic. When the command was offered him, Captain Davis declined, saying that a younger man should be chosen. Yet Captain Davis is only forty-six!

That is putting the age limit pretty low. If a man of forty-six is too old for an important job, the premium on youth must be even higher than we had supposed.

Bahia, a Brazilian city built on two levels, now has two large high-speed American elevators to transport "commuters" from one level of town to the other.

### Canada Sets The Pace

#### In Some Cases Dominion Is Outdistancing Other Nations

Impartial testimony to the progress Canada has made in recent years, which happens to be the period of the Mackenzie King administration, is given by S. H. Logan, general manager of the Canadian Bank of Commerce, in a comprehensive analysis of world business issued recently. Mr. Logan states that while the whole world has shown intense economic activity, bringing production to a new high level, the rate of increased production in Canada has exceeded that of the world by a wide margin in many important branches of economic life.

The rapid growth in the productiveness of Canada since 1926 has given this young country of ten million people a place as a producer alongside of and in some cases ahead of the great nations of the world. Thus Canada is

First in the export of wheat.

Second in automobile manufacturing.

Second in hydro-electric generation.

Third in the production of gold and silver.

Third in the production of paper and aluminum.

Fourth in the production of copper and lead.

Fifth in the production of rubber goods.

Sixth in the production of zinc.

The Dominion does not rank very high as a producer of coal, petroleum and steel, but even with respect to these items production has grown faster than that of the world and is about to make tremendous strides. As Mr. Logan observes, Canada's progress to date only gives a hint of her potential power. The collapse of stock market speculation on this continent leaves the physical structure of the world on a broader foundation than ever.—The Toronto Star.

### Thought Everyone Was Satisfied

#### New York Architect Has Idea For Mixing Letters Mattered

The days are past when love-letters can go astray in the Arctic, said the Rt. Rev. I. O. Stringer, Bishop of the Yukon, addressing the Women's Press Club, Toronto, on the north as it was 38 years ago, and as it is today. He told the story of Indian runners arriving with the mail which had fallen through the ice into the water and which they had dried around a campfire neglecting to put the letters back in the right envelopes. Mrs. Stringer had received a letter addressed to "Jock" from a girl who hoped that he would be back soon to marry her. When the Indians were blamed for mixing up the mail, they replied: " Didn't everybody get one?"

But some, said the Bishop, did not feel like claiming the love-letters intended for them.

### Needed Some Himself

A stout, old lady of 200 pounds was struggling valiantly up the steps of the street car.

"Step lively, Ma," urged the conductor with more familiarity than she liked. "If they'd given you more yeast when you was a girl you'd be able to rise better."

"Yes, young man," she retorted, "and if they'd given you more yeast you'd be better bred."

### Site Of Grain Exhibition

According to a booklet dealing with Regina as the site of the forthcoming World's Grain Exhibition, it is pointed out that the city is the centre of the hard wheat area and that within a radius of 100 miles are found half the population of the province. The estimated wealth of that market is \$2,264,000,000 and the annual buying power \$332,606,625. The city's population is about 40,000.

Harry—"Don't you ever buy candy for your girl?"

Jerry—"Why should I? She's always got some around the house."

### Cartoon

"Why are you crying?"  
"I've lost a halfpenny."  
"Here's another one. Why are you still crying?"  
"Because I didn't say sixpence."

CHAPTER XVI.—Continued.

"No, he," said Grandma, "but he must have been made of India rubber to get off as easy as he did. Doctor Carter was just leaving the office, and the man landed right in his lap, so to speak, so he got a patient. I must say, if such a thing had happened it was nice it happened where it did, on account of the doctor. It was most two hours before the man was fixed up and steady enough to go along. The doctor took two stitches and got paid three dollars. It was a real interesting morning, and four people came in this afternoon just to hear about it. Well, dearie, did Jim tell you the news?"

"News?" echoed Charmian. "I should say you'll tell it yourself. You're out of breath, Grandma, with talking so long and fast. I'm sorry to be late, but Jim was going to Eastboro and it seemed a pity to miss the ride when the foliage is so beautiful. I wish you could have seen it, too."

She turned toward the kitchen, the impending meal on her mind, but the old lady stopped her with a question:

"But didn't he tell you about his mother?"

Charmian came back to ask:

"What about his mother? He never mentioned her."

"You must have made yourself extra diverting then," said Grandma seriously. "George K. stopped in, and 'twas he told me the news. It doesn't seem hardly believable—but Sarah Bennett's going to California!"

"To California?" repeated Charmian in amazement. "And leave Jim?"

"My stars!" ejaculated the old lady. "Don't you know that Sarah Bennett wouldn't any more think of going without Jim than she'd think of going without a pocket handkerchief? It seems she hasn't been feeling very well, and Edward Howe thought a warm climate might help her. Her twin sister, Sophie, lives somewhere out that way, and they're going to her. What's more, George K. says if the climate agrees with her, the chances are they'll never come back! Didn't I say it had been an exciting day?"

CHAPTER XVII.

That night when she lay in bed, staring at a crack in the ceiling that showed weirdly bright, in the light of the harvest moon, Charmian wondered if the evening meal had been fit to eat. She had gone about its preparation in a daze, wondering why Jim hadn't spoken of this big change in his life—feeling hurt that he wouldn't have confided in her—wondering how Wickfield would seem without her old playmate to drop in of an evening, or to pick her up after school hours as he had—telling herself vigorously that she wasn't one bit in love with him—admitting in the next breath that she would miss

him terribly. The clock in the Town Hall tower struck midnight before she closed her eyes.

Yet it had been a diverting evening because the Merrys had stopped in for a chat with Grandma. Doctor Howe, also, had drawn up before the door, and summoning Charmian outside with his familiar whistle, told her not to worry about her "job," that the school board would uphold her in case of trouble.

"But don't let Grandma hear a word about it," she implored him. "Has the deacon been to you already?"

"Not he," smiled the old man. "He knows too well where I'm liable to talk. I heard the story from Jim Bennett. Guess he thought I'd better be prepared. Good-night, child. I won't say a word to Grandma; but you can count on me in an emergency; and, if I know him, he can count on George K., too. Don't lose your sleep."

This short encounter had brought Charmian's thoughts around to Jim, from whom they had wandered during the Merrys' call; but that were switched away again by John Carter, who was teaching Grandma three-handled bridge and wanted Charmian's assistance. They sat up till the unbreakable hour of ten!

Yet despite all these diversions, Charmian couldn't rest. Her anxiety about the trouble with Deacon Purdie, and her hurt that Jim hadn't spoken of his plans, were poor bedfellows. She looked big-eyed next morning, and the doctor said at breakfast: "You didn't sleep well, did you?"

"Do you keep an X-ray machine back of those eyes of yours?" she asked. "No, I didn't sleep—that is, restfully. Our bridge game was too exciting. I felt as if I'd imbibed a pint of coffee."

"I'll drive you to school," offered Jim.

The girl shook her head.

"I'm always grateful, but I need exercise and it's a gorgeous morning for a walk."

"I kind of suspect," said Grandma softly, as Charmian left them, going to the kitchen to prepare their lunch, "that she's bothered because Jim Bennett didn't tell her he was going to California. Seems funny, doesn't it? He never said a word about it; and so far I know, no one else in Wickfield has ever been west of the Mississippi, except George K. and Salina. They took a trip on their silver wedding anniversary—a delayed honeymoon, George K. called it, because they hadn't the money to take them where they were married. They went most everywhere—Yellowstone, National Park, the Grand Canyon, and San Francisco, though I should think they'd have been afraid of earthquakes."

"Well, Doctor, I wonder will anybody break a neck in front of your office this morning. That accident was fortunate to happen where it did; but I guess if Lizzie Baker had seen the narrow escape her cat had, she'd have had a spasm."

It was not a longing for exercise which made Charmian refuse the doctor's offer of a walk that morning, but a desire to walk off the depression that still persisted. She felt more or less depressed, she told herself, as she stepped out into the clear October sunshine, but irritated. Why should she care because Jim Bennett had let her hear the news of him from some one else?

"I wish," she scolded, as she passed the portals of the First National Bank, "I wish I could put Jim and his affair out of my mind for ever and ever!"—which showed that the irritability was not imagined. But this wish, ardent though it seemed, was not to be fulfilled. It was George K. Knobles, issuing from his wide, hospitable doorway, who again reminded her of her old chum.

"Hold on to me!" he called, as Charmian waved a greeting; and giving his Salina an unashamed and hasty kiss, he fell into step with the new school teacher, although her designation was opposite to his.

"Just wanted to tell you not to worry about the school," he began at once. "The board will uphold you as long as the doctor and you are truly elected. Just stick to what you know is right, and dead, and the dead will come to you. What's more, when Jim Bennett isn't here to fight your battles?"

His kind blue eyes smiled at her as she retorted: "Fight them myself, or surrender ignominiously to the enemy!" But her rising color didn't escape George K., whose heart was young in spite of his gray hair, and he said soberly:

"You won't be the only one in Wickfield to miss the boy, my dear. He's fast becoming my right-hand man. His father was my best friend, too—a good man was James Bennett, married to a selfish woman. Salina would take my head off for saying so; but I guess you know the truth. If Jim's father had lived, Sarah would have ruined his life most ille-

## WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinting and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness, and Drowsiness are symptoms of a sluggish liver. Your liver may start the bile flowing on the contrary a good tonic. All Druggists 25¢ and 75¢ per pka.

ly, and now she's doing her best to ruin him."

"He should stick up for his rights, then," said Charmian coldly, and lifted her chin the least bit higher.

George K. cast upon her a sidelong glance.

"Did you ever live in the house with Sarah Bennett?"

"No, thank God!" George K. exploded, "but I know her kind. They break the spirit after a while, Charmian, and Jim, poor boy, has known no other close companionship. Sometimes I wonder how he's kept his sense of humor and his kind heart. Well," as they reached the corner where Main Street turned toward District Four, "I'll be late for the train if I escort you any farther. You'll remember me to my parents."

"I'll remember Uncle George," she answered gratefully, "and—thank you."

To Grandma the morning seemed back to old times. John Carter had left shortly after his customary chat. And all after breakfast, and even the B.P.D. man was behind time, so couldn't be brought was an advertisement!

Grandma tossed it scornfully into the waste basket, and wished that something interesting would occur.

"Seems as if Wickfield was never so far back before," she complained aloud. "All I've seen is Lizzie Baker hanging out her dish towels, and Mr. Murphy hurrying home from the post office with the paper. The children haven't had any fights, or the dogs either! Here come an auto, I do believe it's Jimmy, and he's stopping."

She was right. Jim drew up before the door, got out, kicked a suspicious looking tire, and then came in.

(To Be Continued.)

## Used Experience To Advantage

Men Who Recovered From Insanity Leads Mental Stick

One of the leading figures at a world conference on mental hygiene recently in Washington was Clifford Beers, who was himself an asylum inmate for some time as a victim of insanity. He ultimately got better and resumed his place in society, and when success came to him—he was a graduate of the University of Yale—he devoted his time to leading a world movement in aid of the mentally sick.

A man who has suffered from a terrible illness or affliction, and who, whether he gets better of it or not, devotes his time or money to cure or prevention of that trouble others, has found his true niche in life. None can appreciate what these things mean so much as those who have suffered, and it is probable that a great deal of the world's scientific progress arose from just such circumstances.

There is, however, one great scientist living, whose wisdom still has not contributed to the particular affliction from which he suffers badly: Thomas Alva Edison is almost stone deaf, and has been for many years, yet he has not produced a device to remove that condition. When asked why, he replies that he doesn't want to be bothered by people talking to him.

That may be just his little joke. But it does seem strange that he has never paid any attention to acoustical devices.

Of course, it may be that he considers it more a matter for medicine and surgery than for the electrical laboratory.

Named After Duke

Cambridge Bay, Victoria Island, was named by Thomas Simpson in 1830, after H.R.H. Adolphus Frederick, 6th Duke of Cambridge (1745-1805), and 7th son of George III. Thomas Simpson was a cousin of Sir George Simpson, Governor of the Hudson's Bay Company. Along with an experienced H.B.C. officer, Peter Dease, he explored the Arctic Coast from Alaska eastward in the years 1836-39.

London's force of police-women is to be doubled in strength. In 1925 the number was raised from 24 to 50. Now it is to be more than 100.

The line of the equator crosses no

## Old Secret Revealed

Cruel Sultan's Rod Of Power Held Concealed Weapon

The Red Sultan, as Abdul-el-Hamid II, was known, brought down into the supposedly civilized times of the nineteenth century both the splendor and the wickedness of a darker age. He won his name from the carelessness with which he sent people to a better world, for which they may or may not have been grateful.

One of his peculiarities was that he was never seen without a certain jeweled sceptre in his hand. During a friendly audience he would use it as a staff, leaning his head upon the carved jade cross which formed the handle. In the midst of his throne room, and at the height of the massacre which he ordered in the Near East he used it to emphasize the decrees by which thousands of men, women and children went to their brutal deaths.

None knew just why this symbol of his tyrannic power was always present, but recently, half a century after his death, the secret has been revealed.

Abdul-el-Hamid II, left his sceptre to his successor—the first time that it had passed from his hand. But fate overtook the dynasty in the form of a revolution, and with other royal jewels, the rod of power found its way into the care of antique dealers.

Recently a merchant in the Rue la Boetie, in Paris, took the sceptre from a shelf where it had long rested to show it to a customer. As he handled it he touched the jewels, and suddenly one of them gave way with a little click. He pressed harder, the sceptre opened and there was revealed a long, thin, cruelly dangerous dagger.

The Red Sultan stands revealed as a man who was afraid, who knew that in the midst of his authority he was not safe, that visitor or soldier alike might attempt his life and who carried ever in his own hand the only surety upon which he might depend.

## A Real War Hero

Cardinal Lucon, Of Rheims, Served His Country Loaly

The death of Cardinal Lucon, of Rheims, removes one of the most notable ecclesiastical figures of the war period. When the German guns were trained upon Rheims, when the magnificent cathedral was trembling with their thunder, and part of the sacred edifice was actually smashed by German shells, the Archbishop stood faithfully at his post. He would not leave, though urged to retire to a place of safety. His place, he declared, was with his flock. He protested against the shelling of the edifice, and continued to fulfill his duties throughout the various bombardments. Later, he made his protest more effective, and it was his fiery letter to the Pope condemning the inhumanities of the German deportation of French folk from northern France that drew from the Vatican the famous message of rebuke to the German Emperor.

Cardinal Lucon was made of the stuff that wins for men in other walks of life honors and fame. The example of courage he set, his calmness, his resolute determination and his abiding faith, made the Rheims Cathedral a beacon towards which Frenchmen turned their eyes in the hours of agony. The cathedral still stands, and now its many hollowed memories are enriched by the record of a life devoted to the service of God and man, and the name of Cardinal Lucon is engraved for ever upon its scroll of those who stood firm in their faith during a period when men's faith was sorely shaken. He was a war hero just as much as were Joffre and Foch, and he served his country just as loyally.

## Authors Are Prosperous

There has never been such a time as the present for English writers who catch the public taste. Within the last twelve months one author has made more than £60,000 by a single play, and another nearly £15,000 from a single novel. And both are well in the right side of 40.

Persian Limes and Alabastine, the creator and preserver of beauty in decoration,至今 in every home and wonderland, bring Safeguards and beauties the most delicately-textured skins. Cool and relieves all skin flushed or irritated by weather conditions. Magical in its power to renew and restore a youthful freshness and daintiness is instantly created. Invaluable for softening the hands and making them flawlessly white. Truly the perfect talisman required for the woman who cares.

Minard's for Falling Hair.

## Showed Canada's Efficiency

Opening Day At Antwerp Exhibition Found Building Complete To Last Detail

"Canada scored signally in the early weeks of the International Exhibition at Antwerp, and continues to lead and dominate the Fair," said E. T. Nottle, Director of Exhibits (Department of Immigration and Colonization), Canadian Pacific Railway, on his return from that exhibition, which still has six months to run.

"The reason for Canada's prominence," Mr. Nottle explained, "is Canada alone of all the participating countries, had her building set up and finished, inside and out, on time. Not only that, but the whole area of the Canadian Pavilion was complete in the last detail of lawn and walks, and flower beds, and flower beds. The whole ensemble, in fact, was a striking achievement, which, in a singular manner, gave an impression of efficiency that was decidedly a feather in Canada's cap."

## WHEN YOUR CHILD IS FEVERISH

Give Him Baby's Own Tablets

The health of babies and little children is subject to rapid changes. Thus that mother must be on her guard at all times, and sign of feverishness Baby's Own Tablets should be given—this may avert a serious illness.

Concerning the Tablets, Mrs. Nottle Lee, U.S. Judge, says: "My little boy, now three years old, was not at all well. He was feverish and had no appetite. I gave him Baby's Own Tablets and he was soon well again. I would not be without the Tablets as long as there are young children in the house."

Baby's Own Tablets are sold by medical dealers or by mail at 25 cents a box. Minard's, Brockville, Ont.

Many Government Employees

One out of every five Germans receives a salary or financial aid from the Government. Minister of Labor, Adam Stegerwald, told the Reichstag budget committee. In all, he said, 12,000,000 persons are receiving money from the national treasury in one way or another.

Minard's Drives Away the Headache.

Travels Hour Every Day

Traffic statistics have figured out that one hour a day of the average Berliner's time is consumed riding on omnibuses, street cars or elevated or underground trains. This amounts to 15 full days a year.

Waiter: "Would you like to drink Canada Dry, sir?"

American: "I'd love to, but I'm only here for a week."

There are 3,667,180 letters in the Bible.

## Little Helps For This Week

"That ye love one another."—John xxv. 17.

Give thy heart's best treasures,  
For that is the best; learn;  
Give thy love, and ask not,  
Wait not a return.

And the more thou spendest  
From thy little store,  
With a double joy thou art,  
God will give thee more.

—Adelaide Anne Procter.

The beautiful law of Christian love, life, and truth is, that the more we give of our own capital the more capital increases. The widow's cruse of oil and barrel of meal increased as she distributed them; and a Christian's sunshine and happiness, faith and hope, will be invigorated and multiplied in proportion as he tries to make others hopeful, trustful, and happy.—John Cumming.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high quality article is turned out to worms. These sap the strength of infants so that they are unable to maintain the battle of life and succumb to weakness. This preparation gives promise of health and keeps it.

Only One Restriction

Inquiry has been made at headquarters of the World's Grain Show, Regard as to whether or not the number of exhibitors from any one province or state is restricted. There is no restriction whatever to the number of entries in any of the competitive classes except that an exhibitor will be allowed to make not more than one entry in any one class.

Nul: "I started out on the theory that the world has an opening for me."

Vul: "And you found it?"

Nul: "Well rather. I'm in the hole now."

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates are: The Advance are—display, 40c per inch for first week and 30c for each week thereafter; classified, 20c per inch if no change is made.

For heavy competition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

**Heard Around Town**

Chas. Tooth, of Drumheller, is a Chinook visitor this week.

J. C. Cottrell, of Cereal, was a business visitor in town today.

Mrs. Key, of Cereal, is spending a few days in Chinook this week.

Born—To Mr. and Mrs. J. Vanstone, of Cereal, on Monday, June 16th, a daughter.

Cooley Bros. sold a Model A used coupe this week to A. Matheson, the ferryman at Buffalo.

Mr. and Mrs. H. E. Bradford, of Oyen, visited at the home of Mr. and Mrs. R. Stewart on Wednesday.

Robert Morrison leaves on Saturday morning for a week's holiday, which he intends spending at Edmonton.

Mrs. C. W. Riddout took a few ladies for a motor drive and spent the afternoon visiting with Mrs. J. C. Turple on Wednesday.

Mr. and Mrs. Wm. Hughes, of Edmonton, Alberta, are receiving congratulations on the birth of a daughter (Shirley Dawn), born on June 16th.

Miss Norma Hurley, who has been attending school at Saskatoon, is visiting with friends in that city for a few days before returning home for her vacation.

Owing to the rain on Friday of last week, the Laughlin Sports had to be called off. The date now set for the sports is Friday, June 27th. Don't forget the date.

The following delegates were appointed to represent the Chinook local at the annual U.F.A. Convention to be held at Edmonton: Jas. Young, R. Stewart and Neil McLean.

The Card Club met at the home of Mrs. Jas. Rennie Tuesday evening. The prize was a lovely cream and sugar set, won by the hostess. The next meeting will be held at the home of Mrs. S. H. Smith.

Mr. and Mrs. Trend, who recently returned from an extended honeymoon trip at California, visited at the home of the latter's father, D. J. Stewart, this week. Miss Lillian Stewart also accompanied them.

A public examination day was held at our school here on Thursday, June 12th. Parents and those interested were cordially invited to visit the school at any hour during the day. Classes were conducted as usual, the visitors passing from one room to the other. After school hours the staff pleasantly entertained the parents to afternoon tea. Mrs. E. E. Jacques and Mrs. R. D. Vanhook were in charge of the tea tables, while the Misses Marjorie Lee, Urdine Brownell and Florence Connell assisted in the serving.

The Ladies' Aid held their meeting this afternoon in the church. After the usual business was transacted the ladies quilted a quilt for the C.G.I.T. girls. Mrs. Rennie served a dainty lunch at the close.

Mr. and Mrs. Morrison and baby, of Calgary, visited with the latter's parents, Mr. and Mrs. Peyton, this week. Mr. and Mrs. Morrison are on their way to New Brunswick, where they intend to spend the summer.

Messrs. J. E. Hamilton, J. E. Fisher, A. E. Hanna, H. Telford and W. J. McFalls of Hanna, were in Chinook Wednesday evening on their way to attend a meeting of the Royal Scarlet branch of the Orange Association at Cereal.

The rain of last Thursday night was very welcome in this district and was a great help in giving a refreshing look to the crops that were beginning to need moisture. The prevailing high winds of the week, however, have about offset the good done by the rain, and more moisture is needed. Some crops were badly blown out, but on the whole the wheat crop in this district is looking well.

Word was received here last Tuesday that Clifford Bowman, of Glenisle, Sask., had the misfortune to step on a nail, which caused lockjaw. Mr. Bowman's mother and brother, Charles, left at once for Glenisle. No further word has been received at this time.

**Here and There**

(533)

"I think that the increase in unemployment has stopped the flow of the Fall comes around, things will be much better," declared Professor Leo Wolman, of Boston, interviewed aboard S.S. Empress of Australia, on his return to the terminus of the Canadian Pacific at Gdynia. "The worst has passed," he added, "and things are looking brighter again."

Canada's new championship golf course, the Royal York of Toronto, was opened officially May 19, in the presence of a distinguished gathering of golfers and Canadian Pacific officials. The Hon. George S. Grant, Grand Old Man of Canadian golf, drove the first ball, and later in the day, the clubhouse was honored by the inspection visit of Their Excellencies, Lord and Lady Willingdon. The course is in connection with the Royal York Hotel and will be at the disposal of guests.

W. R. MacInnes, vice-president in charge of traffic, Canadian Pacific Railway, since 1918, and after 45 years' service with the company, retires May 31 at his own request, and will be succeeded by George Stevenson, at present traffic manager. In announcing the change, E. W. Beatty, chairman and president of the railway, said: "Mr. MacInnes has been in the company's service for 45 years and has rendered his accepting duties as freight traffic manager and as vice-president in charge of traffic with conspicuous ability and loyalty to the company's interests. By his retirement the company loses one of its ablest and most trusted officers."

More than four hundred varieties of apples have been originated at the Canadian Government Central Experimental Farm at Ottawa within the last 35 years. As thousands of seedlings have fruited, the apples have been tested and the best of them named and perpetuated for future production.

Five years ago the total output of petroleum in Alberta was 168,640 barrels; last year it rose to 2,000 barrels, while in 1921 barrels came from the Turner Valley, the comparatively new field about 35 miles south-west of Calgary.

Contracts for 65 miles of extensions to the Northern Alberta Railways which run north of Edmonton through the Peace River district, have been let. These extensions are to cost \$2,350,000.

Canada exports more manufactured goods per head of the population than any other country in the world. The exports are to Canada, \$64.80; Great Britain, \$30.58; Germany, \$22.63; France, \$20.58; and the United States, \$25.13. It takes the exports of one American plus one German plus \$6.90 to equal the exports of one Canadian.

The demand for quarter sections east of 160 acres for five homesteads in the West, Alberta, given by the Canadian Government to settlers, continues to increase. In the first three months of this year there were 2564 acres registered, representing 410,240 acres, or a comparison with 340,000 acres registered in the corresponding months of last year.

**BASEBALL**

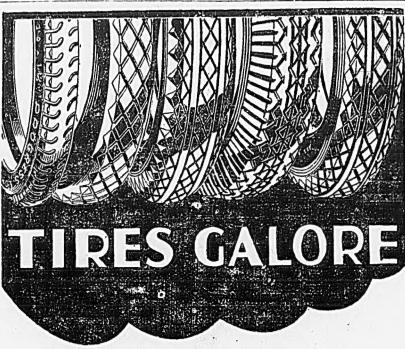

Chinook baseball team drove over to Oyen on Wednesday to play their third game of the league series. They reported a good, clean game of ball. The score resulted in a win for Chinook 11-8.

Cereal played Youngstown in the latter town the same afternoon and Cereal won by a score of 10 to 1.

The standing in the league at present is:

| Played     | Won | Lost |
|------------|-----|------|
| Chinook    | 3   | 0    |
| Cereal     | 3   | 2    |
| Oyen       | 2   | 1    |
| Youngstown | 2   | 0    |
